They will assume their duties at the as-

Robinsons on 600 3D screens

Disney's animated Meet The Robinsons opened on March 30 in 587 digital 3D screens in 484 locations, grossing \$7.1 million in its first weekend out of the total \$25.1 million the film took in from 3,800 other conventional screens. The per-screen earnings for the 3D screenings were \$12,095, compared to \$4,736 for the conventional shows.

The overall opening weekend performance was lower for Robinsons than for the first digital 3D film, Chicken Little, in

November 2005 (\$40 million/ \$26,000 per 3D screen / \$11,200 per 2D screen) but roughly the same as last July's Monster House (\$23 million/ \$15,950 per 3D screen /\$6,500 per 2D screen). However, Chicken Little only ran on 78 3D screens. Monster House on 163. where Robinsons played on almost 600.

In November, when Robert Zemeckis' animated action flick Beowulf opens, some 1,000 digital 3D screens are expected to be in place to show the stereoscopic version the director of *The Polar Express* is produc-

New GSCA board members

The following nine people have been elected to the board of directors of the Giant Screen Cinema Association, joining 12 other members whose terms do not expire this year:

Jonathan Barker, SK Films Inc. Diane Carlson, Pacific Science Center Kim Cavendish, Museum of Discovery and Science

Andrew Oran, FotoKem Film and Video

Rob Lister, Imax Corporation

Mike Lutz, MacGillivray Freeman Films

Larry O'Reilly, Smithsonian Institution (retired)

B.J. Smith, Cinemark USA Phil Streather, Principal Large Format sociation's next meeting, the Film Expo in Los Angeles, April 24-25. For more information about that meeting, see page 6.

Myrtle Beach to reopen in May

On May 22, Destination Cinema, Inc., will reopen the renovated IMAX theater at Broadway at the Beach in Myrtle Beach, SC, adding 3D capability to the 11-yearold facility. Renovations include a new exterior face with a 50-foot (15-meter) March, as well as three events in the week tower with a programmable light show

media that the permit had been denied for two reasons: construction in the lobby was blocking the main doors, and dust from the work had prevented the activation of the fire alarm system. The fire department had allowed the

museum to host a three-day wine, food, and art festival in the building in early of the expected opening, but denied per-

mission for occupancy on March 23, the planned opening day. The permit was finally issued on April 13.

Euromax to meet in London

Euromax will hold its next meeting in London, May 10-11 at the Holiday Inn London, Kensington Forum. The meeting will include screenings of six LF films: Dinosaurs Alive!. Mummies: Secrets of the Pharaohs, African Adventure 3D, The Alps. Dinosaurs 3D: Giants of Patagonia, and 60 minutes of *Flv Me to the Moon*.

The organizers say they expect to start late in the afternoon of

Thursday the 10th, and expect to finish late the next day, but may have a morning screening on Saturday the 12th that would be finished by 10 am.

For more information, and to register, visit www.euromax.org.

Return to Everest 3D is shooting

MacGillivray Freeman Films has begun shooting Return to Everest 3D, a followup to the company's blockbuster 1998 hit, *Everest.* The new film reunites two of the stars of the original film, Spanish climber Araceli Segarra and Jamling Norgay, son of Tenzing Norgay, the Sherpa who, with Edmond Hillary, was first to reach the summit of Mount Everest in 1953. The two will help the Nepalese natives of the Himalayas learn climbing and communication skills to improve safety for trekkers to

Unraveling the Mummy's Curse

by Arabella Cecil

D RRINGGGG! I fumble for the alarm—things don't add up. Normally. Λ clock in the darkness.

2:30 a.m.

It's not the alarm, it's the telephone. Mind goes blank, preparing for a shock. A telephone call at 2:30 a.m. Bad news.

"Arabella!" Full decibels. "Don here! What's going on?"

Don Kempf...? Not who...had crossed my mind. So not bad news. Don doesn't know anyone who could have died. I mean... Good. No one's dead.

"Oh.... Hey, Don. Umm...." I add weakly, "Not much going on...." Don and I have spoken only occasionally in the last two years. This is very...odd. That's it, odd.

Don replies. "I think we've got the money!" Odd, I'm still thinking. What? Money? I'm now trying to be very awake.

"The money." I repeat. "For...Mummies?" Best to check, you know. This is a dream. Just a very odd and loud one.

Inside LF Examiner

Oh. Wow. All of it. Crikey. Strange. Dreams aren't normally...umm. In dreams

"Just thought you should know. So let's speak later — it's probably pretty late there...."

"Yeah, a bit late. Speak tomorrow. Bye."

Hours later, grev dawn breaks. It wasn't a dream, but after seven years' work had the curse been broken? Might we really be going into production?

Lost in La Mancha should be mandatory viewing for anyone entering this industry. Simultaneously gripping, horrifying, and excruciatingly funny, it is all the more so if you are a filmmaker. It records the making of a film still uncompleted: Terry Gilliam's Don Quixote. To people in other professions it's a catalogue of incompetence: a location that turned out to be a Spanish Air Force bombing range; a set and crew washed away by a flash flood; and language barriers that finally brought the film down. But to anyone who understands the hideously precarious nature of what we call "making our living," it is a parable which provokes a muttering of "There, but for the grace of God...."

Even the great George Lucas has said that making a film is "like putting out a fire with a sieve." And maybe that's where we tempted fate - that director Keith Melton, DP Reed Smoot, and about two dozen other crew didn't set out for Morocco in October 2006 armed with the largest sieves we could find. As it was, through shooting and post, we skipped sieve-less, enjoying the luck of the Irish.

The early days

It was May 1996, and I had just returned to La Paz, Bolivia, from an assign-(see MUMMIES on page 8)

Imax Delays Filing Again

n March 29, Imax Corporation announced that it was delaying indefinitely the filing of its annual reports for fiscal 2006 with the U.S. Securities and Exchange Commission and the comparable Canadian filings beyond the official March 31 deadlines. Two weeks earlier the company had postponed its originally planned report and conference call to March 29, saying that an audit had uncovered reporting errors totaling \$2.5 million over the past six years (see The Biz, LF Examiner, March 2007).

In the March 29 release Imax said that while completing the restatement of earnings it had "determined to broaden its review to address certain issues" raised by the informal inquiries begun by the SEC and Ontario Securities Commission last year and first reported by the company in August (see LF Examiner, September 2006). It identified those issues as being primarily the reporting of revenue recognition in the last quarter of 2005, when it first used a practice known as "multiple element arrangement accounting." Under this practice the company booked significant portions of the revenues from ten theater systems it said it had installed, but which did not open in that quarter. Shareholders who subsequently filed class-action lawsuits alleged that this and other accounting techniques had allowed the company to overstate the strength of its financial position.

Imax said that it "does not believe that a potential restatement resulting from (see BIZ on page 4)

The Insiders

Leading the Charge!

by Daniel White

PARTANS! Countrymen, lend me your ears! In the many lean years since the release of the mighty *Everest*, two terrible plagues have been cast forth on us. First, the mighty hordes of "tourist" producers threw themselves against our hallowed walls. But they did not stick.

Now the digital demons pound at our gates with a relentless vigor never seen before. They offer you false images and mystic sorcery, but Spartans, you cannot be fooled, you cannot be tricked with ugly magnifications, grainy images, and poorly conceived framing.

No, Spartans! You built this empire strong and true to the highest standards, and you carry that legacy forward. Spartans! Fear not, the digital demons gain strength in number but they cannot compare to you in size! One of you is more than ten of them!

Now is the time for all free men and women to stand up for honest giant-screen filmmaking in all its excruciatingly high resolution, and fight for what you believe in! Fight for your way of life! Fight for what is good and pure!

Spartans! The time has come take up the challenge, to put your money where your audience sees it. To invest in your movies, your lifeblood!

ARE YOU WITH ME SPARTANS? SPARtans?!?

Spartans?

Anybody seen any Spartans round

I could've sworn they were right behind me a minute ago.

Ummm, anybody got a sweater? It's getting a little chilly in here with just this cape.

Yeah, yeah, yeah. I know you've heard it all before. People in the production community complain too often about the lack of available funding for good films. Nothing new in that, same old same old.

Well, it's not all about complaining. Ten years ago the industry was growing quite nicely. Theaters signed pre-lease agreements that could be taken to the bank and used for devel-

opment and production financing. Then Everest hit like a crashing meteorite, and because its returns were posted in Variety, our industry was inundated with new giant-screen producers offering everything. Theaters had many choices and suddenly it didn't seem so urgent to peel off a bit of box office to help fund films that hadn't been made yet. Many new theaters have never even heard of the concept.

Up until recently as many as 15 or 20 films came out each year. Digitally remastered 35mm also made its way into the lexicon of giant-screen releases, although for institutional theaters this has only served to muddy the waters. It has also encouraged some LF producers to work in lesser formats, narrowing the image-quality gap between giant-screen palaces and mainstream entertainment sources.

For anyone interested in entering the LF business in these few years, the prospect has become even more discouraging. Not only have production levels been very high, but with theaters booking so many films simultaneously, returns to distributors have become extremely unreliable. Better to do something else, wait it out and see what's coming.

This also seems to be the policy of many new theaters. Many of the industry founders (although not all) still assist film production through the Museum Film Network and the Dome Alliance, but most theaters seem to feel that they don't have to take a direct role in supporting film production. This is probably because so many new theaters opened in a time when new films were plentiful and producers didn't ask for investment in either development or production of movies. But that policy may be outdated, especially considering the recent decline in production of educational films.

When I entered the industry in 1987 to help finance and launch The First Emperor of China, there were about 60 institutional theaters. LF film was still a new technology and the experience counted for half the attraction, so theaters were satisfied

This month's focus: Funding LF Films

with about three new films a year.

Today the number of institutional theaters sits at about 210 and last year only five out of twelve new releases were not DMR. The cumulative effect of our complicated market dichotomy, low lease fees, and lack of availability of film financing is having an impact on educational film production levels. It is difficult to see anything changing soon and this drop in production levels couldn't be happening at a worse time.

Getting new and innovative product onto the screen today is critical because if theaters don't begin to take concrete measures to support production soon, real giant-screen filmmaking might be forced into an even sharper decline. Without films on the screen that really pack the "wow" factor, interest in institutional giant screen theaters may fall further.

Although it would be naïve to expect to solve the industry's production financing challenges in this short article, maybe it's possible to plant a seed. As many of you know, in Canada a number of film development and production financing programs have been bestowed upon us by our various provincial and federal governments. Unfortunately, because giant-screen productions are rarely about issues specific to Canada, LF producers here do not qualify for direct government investment. But we do quality for generous tax credits and insurance programs that can account for more than 30% of the budget of a giant screen film. But that is for production, not for development, which often is half the bat-

The Canadian federal government has an interesting way of collecting money to fund certain financing vehicles, one being the Canadian Television Fund (www.Canadian-TelevisionFund.ca). They collect a small percentage of the sales revenue from each of the various broadcasters, then they allow the broadcaster to decide which television shows the money in their "investment envelope" will be invested in. These are

POSITIONS OPEN

Projection Manager, IMAX Theatre, Vancouver IMAX is seeking a projec-

tion manager for the IMAX
Theatre Canada Place. You will
be responsible for managing all
technical operations within the
theatre. This includes the operation, care and maintenance
of the IMAX equipment and
non-IMAX audio/visual equipment for all screenings and
facility rentals in the theatre.

The manager is also responsible for hiring, training, supervising, and staff scheduling; maintaining the high quality of film presentations; assembling film prints; shipping, receiving, and storage of prints and soundtracks; developing and implementing timing and cueing of shows with hosting staff; assisting IMAX service personnel with special projects.

The ideal candidate is a seasoned IMAX 3D projectionist, a team leader with outstanding technical skills, and a capable trainer with hands-on approach to ownership of the projection booth.

If you are qualified and interested in this position or know someone who is, please mail or fax a resume to:

IMAX Theatre Canada Place Fax: 604-682-5955 Email: plo@imax.com

POSITIONS SOUGHT

, IMAX Experienced Imax SR Projectionist Experienced IMAX SR pro-

Experienced IMAX SR projectionist, 3-4 years maintaining and running 2D and 3D shows in a multiplex environment. Experienced in assembly of IMAX trailers and films (2D/3D). Experienced and self taught on most facets of the DTAC system, troubleshooting the system and Sonics systems. Experience with rectifiers and exhaust fan systems.

Experienced on operation and troubleshooting of Hobart 3D (both North American and European) glass washing machines, inventory control on 3D glasses and maintaining records.

Experience on Showtime
Laser and Intelligent light systems (cyberlight, technobeams), Avolite and Azure
2000 board, some experience on Vari-Lites.

Experience on 35mm projection unit (Bell X-1 manual).
Assemble/disassemble of films/trailers. Experience on Dolby A units, basic knowledge of Dolby CP650 unit.

Trained as an audio engineer, Graduate of Trebas Institute, Toronto. Experience in staging, lighting, set construction, sound design, and operations. Have worked at various live and theatrical venues.

Very pro-IMAX/LFF person. Totally dedicated to the industry. Marketing/promotional ideas abound. Willing to learn any IMAX system. Willing to learn/work with any IMAX/LF film production, postproduction or any other aspect companies.

Very people-oriented. Enjoy telling people all about IMAX and the systems I have worked with. More than 13 years of combined experiences. Married, no children. Cana-

dian resident.
Past Instructor/Training
Assignments include Natick,
MA, and Moscow, Russia.

Smithsonian Castle in Disrepair

by Robert Sullivan

As reported on page 4, Lawrence Small, Secretary of the Smithsonian Institution, resigned on March 24 following revelations of "lavish" and unauthorized expenditures by his office. Robert Sullivan was formerly associate director for public programs of the Smithsonian's National Museum of Natural History. This editorial appeared in the Washington Post on April 1, and is reprinted with the author's per-

The Smithsonian Institution has just awakened from a leadership nightmare. On this groggy morning after, it finds it-risk. self soiled by commercialism, Disneyfication, and politicization, and sorely in need of a meticulous scrubbing.

Supporters of now-departed secretary Lawrence M. Small have characterized the former banking executive's tenure at the Smithsonian's helm as a "clash of cultures," positing crisp, data-based corporate values on Small's side and airy, ivory-tower academic values on the other. Nothing is further from the truth. The Smithsonian is blessed with competent, highperforming staff who have been misled and disrespected by a dysfunctional bureaucracy and misguided decision-making. All of this was orchestrated by Small and his administration after he became the Smithsonian's 11th secretary in 2000.

The questionable deals and values of the Business Ventures Unit that Small promoted have tainted and compromised the Smithsonian without generating any significant increases in income over the past seven years. An obsession with protecting congressional support and appropriations led to the censoring of exhibitions and the avoidance of "controversial" topics, while the desire to create a highvolume tourist destination meant that content was dumbed down and interpredown to History as the great founder of a tive themes were oversimplified.

Consider these recent failures: The inflated attendance and income projections used to justify the Steven F. Udvar-Hazy Center – the National Air and Space Mu-

2003 – were woefully optimistic, and the financial strain on the institution. The confusing, light-on-content exhibits of the tendance has sunk by 50 percent since the museum opened in 2004. The American Art Museum finally opened last year — two vears behind schedule and \$30 million over budget. The National Museum of American History is closed for renovation, but the lack of money means that upgrades planned for its exhibits are at severe

> It's time for Congress and the **Board of Regents** to take the Smithsonian and its role as an American icon seriously again

This past decade has not been a clash of cultures, but a crisis of competence at the top of the Smithsonian.

When Joseph Henry, the first secretary of the Smithsonian and arguably the foremost American scientist of the 19th century, balked at leaving his position at Princeton in 1846 to lead the fledgling institution, his friend Alexander Dallas Bache wrote to him: "Science triumphs in vou my dear friend & come vou must. Redeem Washington. Save this great National Institution from the hands of charlatans.... You have a name which must go great Institution. The first Secretary of the American Institute."

Henry did come, understanding that the Smithsonian was to be an international symbol of America's cultural comseum's companion facility near Dulles mitment to scholarship and learning. In

International Airport that opened in late my 16 years at the institution, I was stunned by how many international culresulting income shortfall has become a tural leaders came here to learn how to import the idea of the Smithsonian to their capitals - the idea of a symbol of National Museum of the American Indian national pride and identity, free and open have failed to sustain public interest; at- to tens of millions of visitors to enjoy an-

Those of us inside the Beltway tend to take the Smithsonian for granted and lose sight of its true scope as a national and international asset. But it's time for Congress and the Smithsonian's Board of Regents to take the institution and its role as an American icon seriously again, to honor the legacy of leadership that characterized the first secretaries.

Congress should cease using its budgetary clout to politicize the Smithsonian and prevent its scholars from speaking with clarity and courage about the key issues of our time, such as global warming and human rights. Current policy requires exhibition scripts to be edited by the Smithsonian's public relations office before they are formally approved. Exhibit openings are delayed and content is toned down to avoid conflict with administration policies. This self-editing and censorship will have to cease if the Smithsonian is to regain its reputation and public standing as an academically free source of trustworthy, high-quality content.

The regents, meanwhile, must take their stewardship and governance role seriously. It was the Smithsonian's reputation and integrity as a center of research and learning that enabled the fundraising success of the past decade – not the persuasive powers of Larry Small. It is the respect and affection that donors have for that serious mission and purpose that motivates most of them to give. But this priceless cultural capital has been squandered in the scandals of the past seven years.

The Smithsonian operates in the gift economy, not the market economy. The values and behavior of the secretary and the regents should embody the values of that not-for-profit world. The regents need (see SULLIVAN on page 17)

issue went to press on April 13.

The company announced some good changes to its revenue recognition ac- news in the meantime: it signed a deal with the Daqing Science and Technology Museum in China to build an IMAX® counts," and that while it can't predict theater that will open in early 2008; it when it will complete the annual filings, it added a sixth MPX® theater to the deal it signed with the Dickinson Theatres chain last month (see The Biz, LFX, March 2007); and it hired Joseph Sparacio as CFO to The delay puts the company in default replace Frank Joyce, who resigned last

> negative. Moody's Investors Service changed its outlook from "stable" to "rating under review." Michael Kelman of Susquehanna Financial Group said that although he believes in "the underlying potential of Imax's [joint venture] and digital strategy, we would remain on the sidelines with this stock" until its prospects improve visibly. Motley Fool's Rick Aristotle Munarriz said that "Imax is runmost: cash and credibility," and again slammed top executives, accusing them of incompetence and calling for their removal. "Isn't it time that we...hand over

Bristol IMAX closed

As reported previously (see The Biz, LFX, February 2007), the U.K.'s At-Bristol sci-

The facility has annual income from membership, ticket sales, retail, and other As a result of this news, Imax shares sources of about £4.5 million, but exdropped 18% from \$5.37 before the penses (including the IMAX and rainfor-March 29 announcement to close at \$4.39 est) of £6 million. It had been able to meet centers as it had previously, forcing the tertainment centers associated with Prince

closures. No determination has been made on what will be done with the theater building.

The closure brings to nine the number of active LF screens in the U.K., seven of which are IMAX.

Bournemouth IMAX may be sold

The shuttered IMAX theater in Bournemouth, U.K., may be sold, although it will probably not reopen as a giant-screen thea-But the general reaction of analysts was ter. Local press reports say that the town council has heard that the Sheridan Group of Belfast, developer and original operator of the theater, and NILGOSC, the pension fund that holds the lease, have had "informal discussions" and want to sell their interests in the site.

The 420-seat 3D theater, which opened in March 2002 and closed three years later, has never been free of controversy. After years of legal wrangling over its dening low on the two things that it needs velopment, it opened two years later than expected. It then closed "temporarily" in 2003, and entered a legal limbo after Sheridan was evicted for being in default on rent. It has been unused since March 2003. The external appearance of the building was so reviled by locals for being out of keeping with the surroundings that it was voted as the second-ugliest building in Britain in 2005 (see Shorts, LFX, December 2005).

Stephen Godsall, corporate director of the Bournemouth council, was quoted by the Dorset Echo newspaper as saying, "the rainforest exhibit. The center said that the council continues to press for a family attwo attractions were more expensive to traction within the building and would On April 9 Imax requested a hearing operate and less popular than the two realso welcome any proposal that would im-

Two IMAXes in Japan close

Two of Japan's IMAX 3D theaters, the Mercian Karuizawa IMAX Theatre and the Mercian Shinagawa IMAX Theatre, closed on March 31. The former opened on April 10. They fell as low as \$4.11 be- the deficit with short-term funding and in December 2000 and the latter in April fore the bondholders consented to the grants, but said that the national govern- 2002. THE BIZ

DEALS PERSONNEL

Hotels in their respective cities. The Shinagawa theater was part of a 10-screen multiplex that remains in operation.

LF Examiner was unable to obtain any official comment about the reasons for the closures, although attendance was rumored to be low at both.

The parent company of the Seibu Group, Kokudo Corporation, was rocked by scandals (unrelated to the theaters) in 2004 and 2005 that led to resignations, audit found almost arrests, delisting from the Tokyo Stock \$90,000 of unauthorized Exchange, and a suicide. In the restructuring that followed, a chief internal supporter of the IMAX theaters left Seibu, and new managers were less involved in their management.

The closures lower the total of active LF theaters in Japan to only nine, two GOTO 10/70 houses, and seven IMAX. The Suntory Museum in Osaka is now Japan's only active IMAX 3D theater. Some 28 other Japanese giant-screen theaters, including twelve GOTO, five Iwerks, and three IMAX screens, are still standing but are either inactive or used only for planetarium shows or non-LF presentations. Japan was once second only to the U.S. in the Osaka world's fair in 1970.

Roy Disney invests in Real D

Roy E. Disney's Shamrock Capital **Growth Fund** is investing \$50 million in Real D to fund the expansion of its network of digital 3D cinemas. Meet the Robinsons from Walt Disney Animation opened on more than 650 digital 3D screens in March, and Real D is expected to have more than 1,000 systems in place when Robert Zemeckis's animated Beowulf opens in November.

The Los Angeles Times quoted Shamrock's managing director Stephen Rover as saying, "We've been sniffing around the digital cinema space for a while. It's really the only viable mass-market solution."

Smithsonian's Small resigns

Following revelations and congressional criticism of his lavish spending on travel, meals, and office furnishings, Lawrence

Small, secretary of the Smithsonian Institution, resigned on March 24. As reported here last month (see LF Examiner, March 2007), an independent expenditures by the secre-

tary's office since Small was hired to lead the museum and research complex in 2000. Small was criticized by U.S. Senator Charles Grassley (R, Iowa) for what he called Small's "Dom Perignon lifestyle" at taxpayers' expense.

Days before Small's resignation, the Senate had voted to freeze a proposed \$17 million increase in the Smithsonian's 2008 budget and to cap all executive salaries at \$400,000, the amount paid to the president of the United States. In his resignation letter, Small said, "Making the Smithsonian more bureaucratic and political, however, is not, in my view, conducive the number of giant-screen theaters, with a to sustaining the momentum the Smithtotal of 71 having been built since the sonian enjoys today and, therefore, I'm country introduced the world to IMAX at very troubled about what I see happening. I really see no compelling reason for me to continue to lead the Smithsonian and resign from my position effective immediately."

> Cristián Samper, the director of the National Museum of Natural History, was named acting secretary. Samper, a native of Costa Rica, is a biologist who worked at the Smithsonian's Tropical Research Institute in Panama before becoming director of NMNH in 2003. Paul G. Risser, a member of NMNH's board, was appointed acting director of that museum.

> Sources tell LFX that a report from the Inspector General's office that will focus on the management of the Smithsonian Business Ventures unit is expected shortly.

(See Robert Sullivan's editorial on page 3.)

Sparacio named new CFO at Imax

Imax Corporation has appointed Joseph Sparacio as its chief financial officer, replacing acting CFO Edward MacNeil, who had been holding the position since the resignation last August of Frank Jovce. MacNeil will continue with the company in a "senior financial role."

Sparacio comes to Imax from cable programming company iN Demand, LLC, where he was senior vice president and CFO since 2002. In 1990 he joined Loews Theatre Management Corp as controller, rising to vice president of finance in 1994. From 1998 to 2002 he was vice president of finance and controller of the newly merged Loews Cineplex Entertainment Corp., and was in that position when the company filed for bankruptcy in 2001.

Sparacio is a member of the American Institute of Certified Public Accountants and the New York State Society of Certified Public Accountants.

Brandino joins Minds Eye

Patricia Brandino has been named managing director of Minds Eye International, a Saskatchewan-based distributor of television programming. Brandino will be attending the Cannes Film Festival with Minds Eye president Kevin DeWalt, where they will debut DeWalt's four-hour miniseries, The Englishman's Boy.

Brandino comes to Minds Eve from a long career in the large-format industry, As director of distribution for **Destination** Cinema, Inc., from 2000-2005, she launched National Geographic's Lewis & Clark, Roar: Lions of the Kalahari, and Forces of Nature. She started in the LF world as director of marketing and theater operations at the Saskatchewan Science Center in Regina in 1989.

Brandino tells LFX that she'll be "heading up distribution, marketing, and acquisitions of our TV library," but that she's not necessarily leaving the LF world: she'd like to distribute giant-screen films through Minds Eye. She can be reached at pbrandino@mindseveintertnational.com

GSCA 2007 Film Expo in Los Angeles, April 24–25

T he Giant Screen Cinema Association will hold its first Film Expo April 24-25, in Los Angeles. The meeting is the first to combine the functions of the old Mid-Winter planning meetings with a scaled-down mini-conference that emphasizes film screenings. Ten new films will be screened and nine other projects will be described in a Films In Production session. The GSCA board will meet, as will its various committees, mostly to make plans for the fall conference in Vancouver, BC, Canada.

de Lux.

These new films will be screened:

| African Adventure 3D | nWave Pictures |
|----------------------|----------------------------|
| The Alps | MacGillivray Freeman Films |
| Dinosaurs Alive! | MSC/Giant Screen Films |
| Dinosaurs 3D: Giants | of Patagonia |

| | Sky High Entertainment |
|-------------------------|---------------------------|
| Fly Me to the Moon | nWave Pictures |
| Hurricane on the Bayou | |
| M | acGillivray Freeman Films |
| Lions 3D | National Geographic |
| Mummies: Secrets of the | Pharaohs |
| | Giant Screen Films |
| Pikachu's Ocean Advent | ure |
| | Shogakukan Production |
| Wild Ride | Trinity Films |
| | |

Although a few of these titles have opened to the public already, the Film The conference hotel is the Marina del Expo will be the first industry screening Rey Marriot and all screenings will be at for seven of them. Hurricane on the Bayou the IMAX theater at The Bridge: Cinema and Wild Ride (formerly Ride Around the World) were shown at the GSCA's fall conference in Galveston, TX. Hurricane, African Adventure 3D, and 40 minutes of *Flv Me to the Moon* were shown at the Euromax meeting in Nuremberg in January (see LF Examiner, February 2007).

Although Spider-Man 3 had originally Vancouver, Sept. 23-25.

been scheduled to be shown, more than a week before its May 4 wide opening, it has been withdrawn by Warner Bros.

Films in production include:

| Dolphins & Whales 3D3D Entertainment Ltd |
|---|
| Grand Canyon Adventure 3D |
| MacGillivray Freeman Films |
| Harry Potter and the Order of the Phoenix |
| Imax Corporation |
| Unnamed filmImax Corporation |
| Ocean Frenzy Giant Screen Films |
| Proud AmericanLightSource LLC |
| Sea Monsters: A Prehistoric Adventure |
| National Geographic |
| Wonders of the Great Lakes |
| Sudbury Science Films |
| Arabia 3DMacGillivray Freeman Films |

The May issue of LF Examiner will include a full report on the Film Expo. The GSCA's fall conference will be held in

Premiering This Month

African Adventure 3D: Safari in the Okavango

"African Adventure 3D: Safari in the Okavango takes viewers on a photo safari in the Okavango Delta.

"Described as 'the river that never finds the sea,' the Okavango originates in the highlands of Angola, flows through Namibia, and eventually spills into one of the most arid places on earth, the Kalahari Desert, in the northwestern part of Botswana. The delta created by the flood waters of the Okavango is so large it can be spotted from space, like a giant hand bringing relief to this desolate region. Little known to the outside world until a few decades ago, this secluded 7,700-squaremile (20,000-square-kilometer) maze of lagoons, channels, and islands forms one of the most beautiful and pristine wildlife reserves on earth.

"Departing from the panhandle in the North, where the Okavango meanders through a 10-mile (16-kilometer) wide mat of papyrus, the viewers will venture in the heart of the delta. Led by South African zoologist Liesl Eichenberger, viewers join world-renowned wildlife filmmaker Tim Liversedge for a unique photo safari in the flooded desert and will come face to face with hippos, crocodiles, elephants, lions, and many types of antelopes and birds."

An nWave Pictures production, distributed by National Geographic Giant will be the closest thing to actually being

Dinosaurs 3D: Giants of Patagonia

Screen Film Distribution. Director, producer: Ben Stassen; DP: Sean Phillips.

Dinosaurs 3D: Giants of Patagonia

"If it weren't for a series of cataclysmic events – a comet impact being first on the list — our planet might still be the domain of dinosaurs. Dinosaurs fascinate us so much that many people wish they were amongst us.

"Fortunately, the LF film Dinosaurs 3D

in the presence of these extraordinary creatures without risking our own same time.

"Following Rodolfo Coria, a sites of some of his are birds." major discoveries in Patagonia and

given us the largest living animal to have ever walked the Earth: the gigantic planteating Argentinosaur, and its nemesis, the Giganotosaur, a bipedal carnivore, that could easily challenge the famous T-Rex.

"Deeply rooted in science, the film carries the audience through the lives of two specimens of these superb achievements of evolution. The action is intense and the landscape is out of this world. At times, the camera takes us into space to witness the movement of the tectonic plates or the arrival of a comet that will seal the fate of the dinosaurs.

"As the movie leaves our Patagonian giants behind to jump forward to the end extinction at the of this chapter of Earth's history, we learn that although most species of their evolutionary branch have disappeared, dinosaurs are still with us today. You can see world renowned them easily. They sometimes perch on Argentinian pale- wires in your back yard. You've even ontologist, we visit probably eaten quite a few of them. They

of the foremost mummy specialists in the world, and his wife, Pat Remler, an authority on Egypt in her own right.

If you were once a child, you know the power of mummies. What's more, they appear to transfix adults almost as much, so they should be perfect subject matter for a film. But dead things in dark holes.... Perhaps there was a reason no one had tried to make an LF film about mummies. I joked with Richard Dale, then making The Human Body, "At least your bodies do something."

Bob gave me a list of books to read, and found a fabulous story, ready-made for the screen, unknown outside the specialist community of Egyptologists. It's special not just because of the marquee values -Rameses the Great; his mummy; the first pharaohs' mummies ever found – but also because of its relevance in today's world: people from powerful nations desperately trying to "do the right thing," and inevitably facing difficult decisions. And because at the heart of the story lay this question: to whom do your loyalties belong? To your family, your village, your nation, or the

Bob opened doors. So much of filmmaking is about access. In finance I'd learned the power of knowing your stuff, and how generous people would be with information when they realized vou'd done your homework. But now I had no world-famous institution behind me, just the goodwill of a few individuals. Besides those who appear in the film (Bob Brier, Angelique Corthals, and Zahi Hawass), a couple dozen academics are credited, ranging from Henk Beentje of the Royal Botanical Gardens at Kew in London, to the granddaddy of paleopathology himself, sequent production, I decided that film enforce it. So you'd better get rich, create Art Aufderheide. But they are just the tip of the proverbial iceberg. I probably spoke to, e-mailed, or exchanged letters with about 100 experts in the fields of Egyptology, mummy studies, and DNA.

Why large-format?

The will for authenticity was there, but peril. I assumed that that rule was univerple, like us?" The "us" was **Bob Brier**, one quite rightly, was, "Why is this not a televi-

sion documentary?" My answer was that I for children, but which attempted to anwanted to take people to Egypt. It's a challenging environment, particularly for the about Egyptian civilization: why did it last very young and the frail. Getting there is a so long? major investment of time and money. So the film is virtual Egypt, with added bene- **Institutional support** fits. This would be a way to allow people to glimpse its wonder without the heat, the dust, or the gastroenterological challenges.

In 40 minutes we can only show a few locations, so we chose those we loved most, some of which - particularly Abydos and Seti's tomb – are difficult and or expensive to visit. Perhaps only one in ten thousand tourists to Egypt sees both of truly compelling and unfamiliar story, and work it into the film. The story I found told in appropriate style to have the impact I sought.

Finally, we wanted to make a film that dealt with something extremely accessible

The Maryland Science Center in Baltimore tried for some time to raise funding for the project, and both Jim O'Leary and Frank Corcoran of the Canadian Museum of Civilization in Ottawa were immense contributors to the script over a five-year period. But it was when I approached Giant Screen Films' Don and **Steve Kempf** in late 2002 that the project found its final home, and it is to Don's those sites. This is why we had to find a enduring credit that he grabbed the ball and ran with it.

Then came that amazing telephone call was of epic proportions and deserved to be in the middle of the night. The next day I spoke with Keith and Reed, both of whom I'd wanted to work with for years.

> Six weeks of manic rewriting followed. I ended up with three interwoven stories in

three time lines: New Kingdom (13th censwer one of the most common questions tury BCE), 1881 CE, and the present day. They told a tale in which the grail is not gold or books of ancient wisdom, but 3,000-year-old DNA from the mummies, which may help us find a cure for malaria. That was when I knew the film would eventually get made, because the script worked.

Between October and Christmas 2005, the financing fell through twice. But the project had momentum. Don and I had agreed that we would invest similar amounts of development funding, and he saw it as his time to start spending. We were all aware of standing sets at the Atlas Studios in Morocco and preliminary investigations suggested that they were substantial enough to shoot. Keith, Reed, and I went on a tech scout to Egypt and Morocco in February 2006, just as financing fell through a third time.

(see MUMMIES on page 10)

A portion of the cast and crew at one of the sets at the Atlas Studios in Morocco.

April 2007 LF Examiner www.LFexaminer.com page 9 (from MUMMIES on page 9)

Preliminary scouting in Egypt

Scouting in Egypt was mixed. Reed had shot two LF films in Egypt before, so we with the same bag. Similarly, a filmmaker went to all of the locations he had previously visited and some that I had recce'd on my original writing scout in January 2002. We started with the received wisdom on the best camera angles and then lucky. We knew there were standing antried to improve on them. We agreed that cient Egypt sets at the Atlas Studios, but

Edfu was not quite magnificent enough to be worth the hike. However, Keith, who had been rather underwhelmed by the tombs in the Valley of the Kings, greeted the inaccessible Abydos with "Wow! This is more like it!"

I reduced number of royal tombs in the script to one and left the final decision on which - Rameses VI or Seti I – until we returned to see them both in August. We had to pay the Egyptian antiquities service to have them opened for us. Hatshepsut's

temple was an easy addition, as were-far the right period, or in good enough condisut's expedition from Punt - a caravan of flung corners of the still pristine Valley of tion to use, was slim. the Monkeys, the valley that doubles for the tourist-trammeled Valley of the Kings day, on the northern rim of the Sahara, a for many film and TV crews.

for hire in Egypt were of poor quality and manager for Morocco, showed us a huge great cost. It was the same with the lighting packages, grip gear, and so on. So we dodgy sphinxes, a stunning columned hall-Egypt shoot as simple as possible to stay would have used, and a beautiful split-level within our means. But we were unclear room with a fountain, painted in pastel how to achieve the production values we'd shades and instantly dubbed "Nefertari's hoped for. Leaving Egypt for Morocco, the chambers.' dream of putting Rameses' world on screen was fading.

A big teabag in Morocco

an unusual way. According to the Beeb, a resourceful person makes two cups of tea can maximize production values by using "found" items. This is referred to as "a teabag.'

(L. to r.): Actors Mehdi Ouazzani and Boris Terral (Rameses), the author, and director Keith Melton.

feast was awaiting us. Our new best friend, We also learned that the props available **Hamid Herraf**, who became our unit temple and forecourt, an avenue of rather

on the human body.

Return to Everest is MacGillivray Freeman's first 3D production, and the first time the mountain has been filmed in 3D. The team, led by producer/director Greg MacGillivray and his son and co-producer Shaun MacGillivray, will attempt to be the first to film aerials of the summit from mount system. Director of photography Michael Brown, who has summitted Everest three times, will lead the crew filming the medical team's summit attempt. Shooting began in mid-March and will continue through the summit attempt in March 2009.

La Géode unveils digital system

Paris, unveiled its new digital 3D projection system in March with a virtual reality demonstration. French architect Jean-Pierre Houdin presented his theory on how the Great Pyramid of Khufu may have been constructed in real-time 3D, using a computer model of the structure.

The digital projection system consists of

Sydney's IMAX still has the largest screen.

six Barco Galaxy 12 projectors, each with the highest mountain in the world. The a native resolution of 1400 x 1050 pixels, film will also follow a medical research that together project an image that nearly team studying the effect of high altitudes fills the 85-foot (26-meter) dome. The 22vear-old theater has not removed the IMAX projection system, but reportedly will be showing 3D LF films on the digital system in the near future.

As with the similar Barco system installed in the Tycho Brahe Planetarium in Copenhagen last year (see Shorts, LFX, January 2006), the theater uses INFITEC a helicopter, using the Spacecam camera (Interference Filter Technology) glasses instead of polarized or active LCD glasses.

Vantaa is planning expansion

The city of Vantaa, Finland, is planning a major educational, cultural, and recreational center next to the Heureka science May. The film is set to be released in center. The plan, approved by the city council in December 2006, will expand the science center and add a science shop, as well as a new 250-seat, 3D giant-screen La Géode, the IMAX dome theater in theater. Heureka currently has a 200-seat, 56-foot (18-meter) planetarium dome, outfitted with an Iwerks 8/70 projector.

> The first phase of construction will also include a hotel, restaurant, office space, and a music and dance center, and is set to be completed by 2008. The next phase, expected to open by 2014, will include sports facilities, shops, and museums, including 110,000 square feet (10,000 square meters) of space for the Finnish Aviation Museum.

NZ has largest (35mm) screen

Although there may have been some anxious moments in Sydney, Australia, the operators of that city's LG IMAX Theater can breathe a sigh of relief. The theater operated by World's Biggest Screen Ptv. Ltd. still holds that distinction, despite a new world record set by a multiplex theater in Auckland, New Zealand. The Guinness Book of Records has certified a new 101-foot- (30.6-meter-) wide screen in one house of the Hoyts' Sylvia Park complex as the "world's largest permanent 35mm cinema screen."

The screen at the IMAX theater in Sydney is 97.7 by 117.8 feet (29.6 by 35.7 meters), still the largest cinema screen in the world. Phew!

"well, it was fun to write."

Years later, when you find yourself local resources. Because of the cost, audistanding in Karnak, or at Abu Simbel, working out how to shoot it with magicians like Keith and Reed, well, that's a that extras were relatively affordable in the whole new level of fun.

That fun kept coming as the script went thousands of dollars, but we got a lot of through countless iterations and polishes, flexing as it needed to. The interesting ing as many as 500 extras per scene. Early thing was the extent to which it ruled our audience response suggests that the effort life during production, and the effectiveness with which we worked as a result. With the exception of one department, but more on that later.

Casting

"No bad acting!" had been our mantra from the start. I'd spent a lot of time workshopping with theatrical directors and actors, and Don and Keith were similarly keen to get casting right. We worked with **Ieremy Zimmermann**, a phenomenal casting director out of London, and he and we worked our proverbials off. Initial casting sessions in London found almost all our major characters, even Queen Nefertari, whom I'd been anxious about. How to find that grace, courage, and dignity? And then **Elana Drago** floated in and all I could think was, "This is not homo sapiens as I've previously known them." I can't tell you what others thought, but we seemed to be very fully crewed on the days that she was on set.

So all was well on the casting front, except for Rameses, and for about two months - until two nights before we filmed him – the show became "Looking for Rameses."

After London, Keith searched in Los Angeles, I went with Jeremy to Casablanca, Ouarzazate, and finally Paris. In Paris I had sessions with 53 potential Rameses and knew that this was our last chance. Fortunately, the brilliant Boris Terral was among them, an actor whose range far exceeded that of our original choice. It is not easy for a 21st-century man to wear a skirt, jewelry, and jeweled shoes, and still look dignified, even powerful. It is testament to Boris' ability that he carries it off.

Similar care went into casting the extras. Having done so much research, and

ences rarely see large numbers of people locations we were using. We spent tens of bang for our buck, making up and dressworks on screen.

Actress Elana Drago as Nefertari.

We spent six weeks looking over extras, splitting "New Kingdom" faces from "Arab" faces for the various scenes. Every single extra featured as more than background in a crowd scene was put through improvised scenes by Keith or me or both of us. As with the main cast, the extras were tutored: "Every camera angle is a wide shot and a close up, simultaneously. It's essential that you understand that. Vous comprenez? Qu'est-ce que l'arabe - ou berbère – pour 'comprenez-vous?' Every face gesture counts. Every flick of the finger. The eyes. Do you understand?"

All we were looking for in these casting sessions was imagination. Those who had with a producer's awareness of numbers, I it got the featured roles: priests, market

was able to write to the strengths of the traders, and so on. Those without, didn't, and this paid off. There was one set-up which featured extras who hadn't been on screen, except in "big" films. I knew hand-picked, and it remains on the cutting

> When it came time to film them, I knew that asking Muslim men to wear as little as the ancients did would require making them feel comfortable. But there are fewer restrictions on men's clothing than on women's. Filming Muslim girls or women in relatively revealing ancient costumes was going to be costly and difficult. Morocco is somewhat more tolerant than Egypt, so I wrote in a scene with female extras only – no men – that we filmed in Morocco. Although the costumes were perfectly discreet by western standards, I asked our first assistant director to close the set to non-essential crew, as you would for a nude scene in the West. The girls relaxed visibly, allowing them to give more natural performances.

Challenging our budget: Egypt

Egypt has a reputation for being challenging and expensive for foreign film crews. We could not afford the rack rates quoted by the big local producers, so I sought partners who would help us put our cash on screen. We hired a BBC producer from the blockbuster Egypt series to act as production consultant. Through the British ambassador to Cairo, Derek Plumbly, and Sally Goggin at the British Council there, I met Hala Galal and her company, SEMAT. It was a big gamble, as Hala had not worked on films of this scale, but I trusted her from the moment I met her, as did our line producer Greg Eliason. Today Hala is not only one of Egypt's most accomplished documentary filmmakers, but also the latest major producer in Cairo.

We went into this production with no safety net, a strategy that was put to the test by our newly appointed art director. During the "welcome aboard" drink following his hiring, he turned to me with a winning smile and said, "Obviously, we don't have to stick to our budget in the art department, do we? You know that the art department always goes over budget, right?"

(see MUMMIES on page 12)

By then I'd run out of energy to had to spend on costumes. I rang her in paroxysms of giggles – we didn't have that much to spend on the camera department! – to thank her and apologize for wasting her time. But she'd have none of it. If that's what you've got, that's what

> With no staff, impossibly limited resources, and all the challenges of an international production, she delivered almost a thousand costumes. Their quality is demonstrated by a fact and an anecdote. There is not a single machine stitch or machine pleat in any of the ancient Egyptian clothes: they all had to be made by hand or, according to Lindsay, "they'll look awful." They're now on tour with the exhibit accompanying the film.

> Egypt expert Pat Remler confided to me that she and Bob Brier had questioned Lindsay about the presence of gold stars on the priest's leopard-skin costume, wondering if for once there might have been a slip up. Her appreciation of Lindsay's research only increased when we reached the Cairo museum. There they were, as Lindsay had seen on the tech scout in August.

A dedicated team

Lindsay was just one stellar member of a pretty stellar team. We all landed in Morocco from L.A. and almost immediately drove the four hours to the dunes in the

rity who will restore the image and scholarly standards of the Smithsonian, along with the trust of the public and Congress.

The Smithsonian needs a leader who will restore the confidence of a demoralized staff, reassure hesitant donors that the institution's integrity and values are secure, and encourage its scholars to speak with clarity and courage on controversial issues. None of the in-house candidates mentioned as possible successors to Small has, in my view, the capacity or experience to accomplish this. The academic landscape, however, is peppered with charismatic leaders of substance, vision, and imagination who have led successful capi- Smithsonian's educational mandate serital campaigns for fractious organizations without compromising their standards and academic freedom. Such a leader can be brought to the Smithsonian. Merely reorganizing the existing players will not do. The Smithsonian needs to be reinvented.

The institution's scientists are conducting critical research in areas of vital importance to contemporary society. Whether it is the degradation of coral reefs or the deterioration of habitats and species loss, these scientists have to be able to speak with courage and conviction about their research and its consequences. An institution of substance and ideas must be allowed to say dangerous things and engage the public candidly in an open forum.

signer Mike McDonough. Even though Keith and I were based in L.A. with most of our post-production crew, the site saved us months of time in getting approvals.

Wrapping up *Mummies*

So many people and teams who were critical to the film have not even been mentioned yet, but this article is already too long. We shot for 26 days to script and storyboards, exposed 129,000 feet of it's less than half what we're repeatedly

> hearing suggested.) Illness struck only during the tech scout when Keith and I were struck down for 24 hours each. However, during shooting we did not lose a single hour of filming to illness, and lost only a couple to weather or logistics.

We worked 12-hour portal-to-portal days, but incurred overtime only once, when we were stuck in that darned sand storm. We lost just one shot to x-rays in customs, and a half dozen shots to camera problems. All this during

Ramadan, across languages, culture, and

And so here we are, a few weeks after launching the film. I don't know how successful it will be or how much you will like it. But I do know that it's the best film that I know how to make right now on this subject in this format with these resources. And I think that I can speak on behalf of Keith and Reed and all of our other amazingly talented collaborators: I

I can't do better than to quote Hugh Laurie, "I know everyone says they have a wonderful crew and certainly that can't be the case. We can't all be wonderful. Someattributed and remunerated, even though body somewhere is working with a crew of drunken thieves. But it's not me. They smell of newly mown grass."

Or newly blown sand, anyway.

Lucky with wildlife

With the helicopter gone and art departments packing up, Keith, the stellar camera team, and I spent an hour shooting desert scenics. I'd photographed scarab beetles on the rippling Moroccan sand before and thought this most Egyptian of images might work for the DNA transition. When we captured a few beetles in water bottles, Keith and Reed indulged ing – held off until we'd wrapped on the the producer. Beginning of the shoot, you know. Everyone still being nice.

"RRRRRR!" The camera purred, and in the camel caravan sequence. An extra the first beetle plopped out of the bottle had collapsed from heat exhaustion under in a glob of wet sand just right of camera frame. Hmmm. This might easily become

But then something amazing happened. and immaculate Calvin Kleins were re- The second beetle hit both his marks from

bottom right to top left of frame in a perfect performance. Wow!

But the biggest surprise of all was Reed, who popped up from the viewfinder rhapsodizing about the shot, how it was the most perfect thing he'd ever seen, how lucky we were, and so on. In all the weeks that followed he was teased mercilessly. Life-size temple set? Queen's chambers with beautiful maidens? Five hundred flaming torches and extras? They were all nothing compared to the Beetle Shot.

Weeks later the first shipment of rushes reached the lab. Terrifying to say, two cans had been opened by U.S. Customs. Thankfully, Rick Gordon at RPG Productions reported that we'd lost only one shot, which he didn't think we'd need any-

That night Reed dreamt it was the Beetle Shot.

Giving something back

Too often, academics I know have complained about being called up by filmmakers, sucked dry of information, only to hear nothing about the project until they see their cherished anecdotes retold on network television. We bent over backwards to ensure that academic advice was those payments were extremely modest.

Ancient Egyptian costumes on the temple set.
